

# MELASSI NDJIO FRANCOISE

---

Current Master's in Power  
Systems Engineering

Melassi is a young, hardworking and integral student.

She obtained her B.Eng. from the University of Buea, Cameroon, where she studied Electrical and Electronics Engineering specialty power system and graduated in 2021. She worked on how to produce electrical energy from organic waste using microbial fuel cells.

She went on to take a Master's in Power Systems Engineering program in the same university where she was able to obtain a credit seeking mobility scholarship to complete her Master's

research at an accredited African University under the MIRET program. She continued with the same topic and aimed at optimizing her system for maximum power density.
